REVERSE TABLE LAMP, PORTABLE
Designed by *Aleksandar Lazic*

The portable iteration of the Reverse Table Lamp masterfully combines raw and refined elements, drawing inspiration from the structural play of geometric constraints. The conical base is made from untreated stone, with natural imperfections that highlight its organic beauty. The base is complemented by a curved, bronzed aluminium shade with a smooth, polished finish, creating a striking contrast of textures. An opal diffuser provides soft, even light, ideal for creating a warm atmosphere in any setting. With a dimmer switch adjustable to three brightness settings, the lamp offers flexibility for different lighting needs. IP44-approved, it is suitable for use in wet rooms and outdoor spaces. To ensure longevity, it should be stored indoors when not in use.

This rechargeable lamp can also be used with the Audo Charging Board. However, due to the size of the lampshade, not all ports on the board can be occupied simultaneously.
