

PC COLLECTION

DESIGN BY PIERRE CHARPIN

PC COLLECTION

Pierre Charpin's PC lamp series is a collection of refined and precisely engineered multifunctional lamps, featuring a variety of designs and functions. The collection includes variants with single- and double arms, as well as free-standing, desk, clamp, suspended and wall-mounted lights, as well as an outdoor series. Common to all designs is the designer's intention to keep the object as visually simple as possible, making sure technical components are kept out of view.
