

# Mademoiselle Philippe Starck

This is an innovative design for an armchair in terms of its clever and novel combination of two aesthetic qualities: the structure is an injected mould of transparent polycarbonate upon which are placed four fasteners, allowing for a sturdy yet flexible fit to a seat made of expanded polyurethane. Mademoiselle's innovative technology consists in the use of unusually thick, soft fabric for the seat, which allows for maximum comfort and enhanced aesthetic quality. Its boasts a harmonious linear design and extraordinary comfort. For business orders, personalized compositions using Kvadrat® fabric - Linea Prato Plain – can be arranged. In this case, the minimum order is for 20 items, quotations given on request.

Elegant and fashionable are words to describe the version designed by Rosia Missoni with fabrics from the collection of Missoni Home. Among the versions are: Vevey, with multicolour, kaleidoscopic flowers in red or burnt tones and Cartagena with black and white flower graffiti.

## Materials
